Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner questioned the meanings of the limitations "large computer memories", "frequently", and "infrequently". Applicant's representative pointed out that page 3 of the specification lines 6-7 state that "large computer memories" "are sufficiently large so as to prevent simulation via the use of one-to-one memory file addressing for all of the memory addresses". The terms frequently and infrequently are also used on the same page, but Examiner stated that their meaning might still be considered indefinite, and suggested the use of the language "more frequently" and "less frequently" as indicated at page 9 of the specification, lines 7-19, also at page 14 lines 6-14. These sections clarify that "more frequently" means comparatively more than "less frequently". This change was agreed to and is entered by the attached Examiner's amendment..
